Portfolio and case studies: berlindaanaman.vercel.app

PMP-certified product and technical project manager with 5+ years across data, software delivery and product. I take digital products from idea to launch in regulated fintech, healthtech, SaaS and mobility: defining requirements, sequencing roadmaps, managing engineers and vendors, and testing until a release is ready. A mathematics and data background lets me work through APIs, architecture and trade-offs with engineers, then explain them plainly to founders and regulators.

15	200	80%	5
products delivered or managed across six sectors	bookings for a zero-to-one product, 15% repeat	of a crypto exchange's 100+ waitlist from one campaign	person cross-functional team led for 2+ years

EXPERIENCE

Project Manager (covering Product) | Hyro Exchange Company Ltd, Accra Apr 2026 to Present

Pre-launch digital-asset exchange admitted to the Ghana SEC regulatory sandbox.

Case study: berlindaanaman.vercel.app/work/hyro

- Defined MVP scope, phased roadmap and governance, and structured a 60+ item backlog across 10 workstreams (KYC, payments, on/off-ramp, settlement, wallets, authentication), sequenced by dependency readiness.
- Grew the pre-launch waitlist past 100 sign-ups in June 2026 with a World Cup prediction campaign that drove 80% of sign-ups; wrote the rules, built and tested the entry flow, and launched it the same day as the brief.
- Chose direct National Identification Authority facial verification over a turnkey KYC vendor and led onboarding through API handoff; the KYC backend integration is deployed and end-to-end testing is under way.
- Took a stalled Data Protection registration from application to a provisional certificate, clearing a go-live dependency.
- Led technical review of the external vendor's MVP proposal (stack, authentication, on/off-ramp, trading, deployment), challenged scope gaps and moved production deployment from Vercel to AWS.
- Wrote the compliance module requirements (KYC tiers, risk assessment, AML monitoring, alerts, STR reporting, audit trails) and coordinated hiring for cyber security, blockchain and full-stack roles.
- Built an AI workflow that turns meeting summaries into Jira tasks, Confluence pages and twice-daily Slack reminders for open actions.

Product Manager (Freelance) | Lepta Jul 2026 to Present

Lepta QA (software testing platform) and Lepta Studio (photography business platform), both live SaaS.

Case studies: berlindaanaman.vercel.app/work/lepta-qa · [/lepta-studio](https://berlindaanaman.vercel.app/work/lepta-studio)

- Own product for two live SaaS products in a team of three, working with the CEO on vision and setting priorities for the developer.
- Documented PRDs and user stories with traceable requirement IDs and acceptance criteria for both products, now the basis for all test planning.
- Simplified overloaded feature sets by testing every flow end to end and sequencing scope into an MVP and three follow-on releases per product.
- Redefined pricing into five tiers per product, from Free to Enterprise, and wrote the go-to-market and marketing strategy.
- Brought 15 people across two product teams (Hyro and Medirevs) onto Lepta QA as their testing workspace by October 2026.

Product Manager (Volunteer) | Medirevs, Accra Jul 2026 to Present

Ghanaian digital health company. Doctorevs (telemedicine) and Dieti (AI nutrition), both in beta testing.

Case study: berlindaanaman.vercel.app/work/doctorevs

- Wrote the Doctorevs PRD covering 10 user roles and a four-release plan, with launch targets of 80% booking completion and 95% successful virtual consultations.
- Wrote 60 test cases across role-based workflows and lead beta testing with a 10-person team.
- Own requirements and release scope for Dieti, from a scan-to-history MVP to paid plans and dietitian services.
- Run stakeholder demos and keep product documentation and actions current in Confluence and Jira.

Technical Project Manager & Operations Lead | Annologic LLC, Accra

Nov 2023 to Present

Technology delivery firm serving local and international clients across software, AI, Web3 and mobility.

Case study: berlindaanaman.vercel.app/work/transparent-rentals

- Took Transparent Rentals, a chauffeur booking service, from idea (Oct 2025) to launch (Jan 2026) as product and delivery manager; it has completed 200 bookings, 15% from repeat customers, with a 5.0 Google rating from 20 reviews.
- Cut the booking flow from 3 screens to 2 in February 2026 to keep booking under 60 seconds, and aligned channel strategy with data showing 73% of bookings start in WhatsApp or social channels.
- Led a 5-person cross-functional team for 2+ years and coordinated delivery of 10 client and in-house products, introducing Definition of Ready/Done and sprint and reporting cadences.
- Kept a DeFi yield-farming MVP on track through a Hyperliquid-to-Solana pivot (Jan to May 2025) with a formal change log across backend, frontend and DeFi specialists.
- Led requirements and demos for an AI certificate-forgery detection POC for the Ghana Investment Promotion Centre (Jun to Nov 2024), covering OCR, semantic matching and signature checks.
- Coordinated delivery of the Cerebrum decentralised GPU network (client-launched Jan 2025), the Byond iOS app (App Store, Feb 2026), and five web and e-commerce products.

Business Intelligence Analyst | Dataware Tech Ghana Ltd, Accra (Remote)

Nov 2022 to Aug 2023

- Built four Power BI dashboards and loan-risk models for senior stakeholders, and automated weekly reporting, saving the operations team about 12 hours a week.
- Aligned KPIs across marketing, finance and operations, and mapped a financial client's manual workflow into a Power BI data pipeline.

Lead Generator | Absa Bank Ghana Ltd, Tema

Nov 2020 to Apr 2021

- Managed retail client relationships, contributing to a 20% increase in lead conversion, 90% customer satisfaction and 100% query resolution.

SKILLS

Product: discovery, PRDs, user stories, roadmaps, release planning, prioritisation, pricing, go-to-market, UAT

Delivery: Agile/Scrum, sprint planning, RAID, change control, vendor management, stakeholder reporting
